

BOOTSTRAP

This worksheet aims to be a first contact with the CSS framework Bootstrap. The purpose of these exercises is to explore the framework.

1) MY FIRST BOOTSTRAP PAGE

- Create the folder "CAD/Worksheets/03-Bootstrap/part-1" to place the initial code of this worksheet. It is important to follow this structure to later use GIT. Copy to the folder all HTML files from the previous worksheet;
- Inside the folder "CAD/Worksheets/03-Bootstrap/part-1/" create a page "starter.html" with the "Starter template" from Bootstrap documentation (<https://getbootstrap.com/docs/4.5/getting-started/introduction/>) ;
- Check if the solution is HTML compliant;
- Commit and push your changes to the remote repository.

2) HOME SWEET HOME

- Reimplement the Dashboard (index.html) for the Home Sweet Home page (from previous classes) using Bootstrap's Cards.
- Add a navigation bar that allows to navigate between the Dashboard and the History
- Reimplement the History page (history.html) using the CSS table modifiers from Bootstrap
- Check if the solution is HTML compliant;
- Commit and push your changes to the remote repository.
