

CSS3

Please Note: This worksheet aims to practice CSS3 (selectors, rules and properties), use of media queries and use an external semantic CSS framework. Each exercise as a video to clarify all questions related to appearance and behavior intent.

1) My first CSS stylesheet

- Create the folder "CAD/Worksheets/02-CSS/part-1" to place the initial code of this worksheet. It is important to follow this structure to later use GIT. Copy to the folder all HTML files from the previous worksheet;
- Inside the folder "CAD/Worksheets/02-CSS/part-1/css" create a stylesheet called "style.css";
- Reference the stylesheet in the HTML document;
- The stylesheet and the HTML pages should be change in order to have the appearance shown in the video. The following table contains some hints for the values to apply to some elements / properties:

Element / Property	Value
Base font	Google font "Roboto Mono"
Background color for the entire site	#eee
Background color for the header	#495867
Background color for navigation	rgb(87,115,153)
